Conejo Free Clinic
80 E. Hillcrest Dr., #102
Thousand Oaks, CA 91360

Questions? Please call: **805.444.6746**

The Conejo Free Clinic (CFC) provides medical care without charge for thousands of people each year who are without healthcare access. This is made possible by our extraordinary all-volunteer team of over 90 physicians, nurses, nurse practitioners and support staff who provide over 400 three hour clinics in Family Practice, Women's Health and Pediatrics annually. Our professionals come from Los Robles Hospital, Amgen, Kaiser, UCLA, and many private practices throughout Ventura County.

Women's Club
LEAD SPONSOR**

Breast Cancer Realities

- 🎀 Ventura County has the highest incidence of breast cancer in women in the entire state of California.
- 🎀 Breast cancer is the leading cause of death for women ages 35 to 50.
- 🎀 Every 12 minutes, a woman dies from breast cancer; many because it was not detected early enough through regular mammograms.

The Conejo Free Clinic proudly provides mammograms and other essential breast cancer detection imaging for our patients without charge. No one should have to postpone or forego their annual mammogram because of lack of insurance or finances.

If results show suspicious findings, we immediately schedule advanced testing, also free of charge.

Without us, many women would miss these critical tests when timely detection could save their lives.

We can help women in Ventura County and surrounding areas with early breast cancer detection care because of our generous donors.

They share our concern for the heartbreaking crisis of breast cancer, which can strike a mother, sister, daughter, friend – or themselves – at any time.
